EXECUTIVE PROFILE

Elemi Atigolo is an internationally recognised thought leader, advisor, speaker, and innovator at the intersection of financial architecture and artificial intelligence. With dual degrees in finance and computer science, he bridges complex technological capabilities with institutional strategic priorities.

With over two decades of experience across finance and technology, Elemi explores how AI and emerging agentic systems are creating new opportunities and competitive advantages for financial institutions. His work focuses on how AI is reshaping organisational strategy, operating models, and the core economics of asset managers, wealth managers, insurers, banks, and private capital firms.
